Data Analyst | SQL, Power BI, Python

EDUCATION

Brigham Young University

Bachelor of Science: Statistics, Emphasis in Data Science

Apr 2026

Provo, UT

EXPERIENCE

Okland Construction

June 2026-Present

Data Analyst Intern

Salt Lake City, UT

- Validate construction data using SQL to verify accuracy and reliability of Power BI reports used by project managers and directors.
- Support report certification by investigating data discrepancies, documenting findings, and helping ensure stakeholders can confidently use reporting for operational decisions.
- Respond to ad hoc data questions from project managers and leadership, translating business needs into clear, data-backed answers.
- Add and maintain dbt YAML data-quality tests to identify issues and improve the consistency of company reporting data.

Indigo Innovations

Nov 2025-June 2026

Employment Specialist

Provo, UT

- Reviewed 100+ AI-based candidate interviews daily and advanced roughly 50% of applicants, helping maintain an efficient high-volume recruiting funnel.
- Used recruiting performance data to inform budget allocation across applicant sources, helping direct spend toward higher-performing channels.
- Built and maintained structured datasets in Python to track source quality, candidate progression, approvals, and hiring results.
- Produced reports and funnel analyses that supported recruiting decisions and improved visibility into conversion rates across the hiring pipeline.

Blue Raven Solar

May 2023-Oct 2024

Property & Financing Team Lead

Orem, UT

- Identified and implemented process improvements, increasing coordinator productivity from 62% to 94% within one month.
- Coordinated audits for a team of 15, delivering actionable feedback that reduced errors and improved report quality.

TECHNICAL SKILLS

- Programming & Data: Python (pandas, NumPy), R, SQL, dbt
- Tools & Visualization: Git, Linux, Power BI, Tableau, Excel, Matplotlib, ggplot2

PROJECTS

NHL Team Performance & Fatigue Analysis

- Built a Python ETL pipeline to analyze how rest days and back-to-back games affect NHL team performance using MoneyPuck data.
- Developed an interactive dashboard to evaluate fatigue effects on win probability and expected goals.

Applicant Funnel Analytics Dashboard

- Built a Python and SQL pipeline to analyze applicant conversion rates across hiring stages.
- Created Tableau dashboards comparing funnel performance by source, cohort, and location to support recruiting strategy.
